Columnar English Oak

Zone: 5-8

Height: 60'

Width: 20'

Crown: Upright
Crown density: Very dense
Growth: Medium fast
Soil: Adaptable, well drained
Drought: High tolerance
Fall Color: Copper

This is an especially strong inclusion in the landscape. It is massive. But it has few bad habits. It keeps it's brown leaves most of the winter and some object to that. It is sometimes susceptible to powdery mildew. That's about it. It's easy to grow, very little pruning or staking required. It transplants well from containers or B&B.
