Acer palmatum 'Crimson Queen' 'Crimson Queen' Japanese Maple

Zone: 5B

Height: As trained

Width: As trained

Acer palmatum 'Crimson Queen' was one of the first 'Laceleaf' Japanese maples used in American landscapes. It forms a dark purple round mound of leaves with a lacy texture. The mound will be as high as trained, and it will weep from there. With age the trunk becomes twisted and turned into an amazing jumble.
